CATEGORY PUBLIC BUILDING & URBAN DESIGN

**THE WAYSIDE CHAPEL**  
ENVIRONA STUDIO

This project is a prime example of socially progressive, environmentally cutting-edge architecture, all achieved within a low budget. Sustainability is built in, and not just added on.

Tone Wheeler from Environa Studio and John Hesse from Hyne Timber

**Jury citation:** The Wayside Chapel has a refined and responsible design, catering for human comfort predominantly through natural ventilation and passive systems. Located within the built, bustling area of Kings Cross, it has an awareness of how communities should live. Here, sustainability transcends built elements so that social sustainability is achieved, as evident in the generous public spaces forming the project's street amenities.
